Advances in Physiology Education (ISSN 1043-4046) is published in print once a year and online (quarterly) at http://advan.physiology.org (ISSN 1522-1229) by the American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991.

Subscription Prices (postpaid): Online subscriptions are available free to all, worldwide. Institutional print: $80.00, US; $90.00, Canada and Mexico; $95.00, elsewhere. Nonmember individual print: $50.00, US; $60.00, Canada and Mexico; $65.00, elsewhere. Print for APS members is free. Online free to all worldwide. Subscriptions from outside the United States are payable in US currency or full equivalent. Subscriptions are accepted on a calendar-year basis only. POSTMASTER: Send address changes to Advances in Physiology Education, 9650 Rockville Pike, Bethesda, MD 20814-3991 and online at http://advan.org.

The American Physiological Society disclaims responsibility for any injury to persons or property resulting from any ideas or products referred to in any article or advertisement.
CALL FOR NOMINATIONS

For the Arthur C. Guyton Educator of the Year Award

The Arthur C. Guyton Educator of the Year Award supported by Elsevier ($1,000 cash prize plus reimbursement of the advanced registration fee, a framed, inscribed certificate, up to $750 in travel reimbursement to the Experimental Biology meeting and a complimentary ticket to the Section Dinner) recognizes a full-time faculty member of an accredited college or university and member of the APS who has independent evidence of: (1) excellence in classroom teaching over a number of years at the undergraduate, graduate, or professional levels; (2) commitment to the improvement of physiology teaching within the candidate’s own institution; and (3) contributions to physiology education at the local community, national or international levels. The awardee is requested to write an essay on his/her philosophy of education for publication in The Physiologist.

The typical nominee will have shown excellence in teaching and have made significant contributions in student advisement, graduate education, and/or curriculum design and reform at their institution. The activities that distinguish a candidate in the rankings include outreach activities at the state, national, or international level; contributions to education through APS activities; peer-reviewed educational journal articles; and widely disseminated publications such as commercially produced textbooks, lab manuals, or software. Unsuccessful nominees may be reconsidered for the award during the subsequent year with notification to the nominee and the nominator and receipt of updated information. The award winner is announced at the APS Business Meeting during Experimental Biology.

Nominations Process: Each nominee must be nominated by a member of APS. All candidate materials must be uploaded by January 8, 2014. To upload documents, please visit the APS Award Module at https://www.the-aps.org/awardapps/login/index.cfm. Finalists will be contacted and asked to provide further information.
The APS Journals

One Physiology Collection—to Multiple Disciplines

BIOSIS PREVIEWS • TRSI (formerly ISI) Web of Science • MEDLINE and PubMed: APS Journal content is indexed through all of these excellent services.

HighWire: APS journals are hosted by HighWire Press (a division of Stanford University Libraries), the leading ePublishing platform for high impact, peer-reviewed content, with over 750 Science, Technology, and Medicine titles.

CiteTrack: Use your own criteria and key words to be notified of newly posted APS journal content.

AuthorChoice: Authors may purchase this option and have their articles publicly available upon publication.

Free Color: Regular or Student members of APS who are first or last authors of articles in any of the APS research journals may be eligible for free color images.

eTOCs: Receive instant notification of new content.

RSS Feeds: Another great way to receive a notification of newly posted APS journal content.

Articles in Press: Instant access to newest research within days of acceptance.

Legacy Content: Online package of 100 years of historical scientific research from APS journals.

Journals Digital Library: A single package featuring peer-reviewed research and review journals of the APS.

FASEB
Federation of American Societies for Experimental Biology

With over 100 years of service to the biological and biomedical sciences community

Stand Up for Science!

We Support Scientists By:
- Advocating for funding for biological research
- Advancing policies that facilitate research and reduce regulatory burden
  - Improving the environment for science training and education

FASEB, the voice of biological and biomedical researchers, represents 26 scientific societies and over 100,000 scientists and engineers.

Join our e-Action Alert
Help us communicate with Congress on key research issues by visiting www.faseb.org/StandUp to join our e-Action list and keep up with the latest policy news.

FASEB thanks APS and its members for their support
If you’re not a member of APS, join now. Benefits include reduced fees for scientific meetings, conferences, and journals; access to continuing education, professional development and career resources; and opportunities to contribute to science policy, advocacy, and public education.

Join APS at www.the-aps.org
For your career in science, there’s only one Science

A career plan customized for you, by you.

myIDP.sciencecareers.org

Recommended by leading professional societies and endorsed by the National Institutes of Health, an individual development plan will help you prepare for a successful and satisfying scientific career.

In collaboration with FASEB, UCSF, and the Medical College of Wisconsin and with support from the Burroughs Wellcome Fund, AAAS and Science Careers present the first and only online app that helps scientists prepare their very own individual development plan.

Visit the website and start planning today!

HISTORICAL PERSPECTIVES

APS: 125 years of progress of physiology as a scientific discipline and a profession
R. G. Carroll, M. Frank, A. Ra’an, and M. L. Matyas

APS at 125: a look back at the founding of the American Physiological Society
K. L. Ryan

Recognition of American Physiological Society members whose research publications had a significant impact on the discipline of physiology
C. M. Tipton

The force-frequency relationship: insights from mathematical modeling
J. L. Puglisi, J. A. Negroni, Y. Chen-Izu, and D. M. Bers

EDITORIAL

Physiology for the 21st century: a sourcebook of laboratory activities in physiology
D. U. Silverthorn

A PERSONAL VIEW

Reexamining Michaelis-Menten enzyme kinetics for xanthine oxidase
J. B. Bassingthwaighte and T. M. Chinn

STATISTICAL PERSPECTIVES

Do as you would be done by: write as you would wish to read
G. B. Drummond and S. L. Vowler

REFRESHER COURSE

Interactions between the central nervous system and pancreatic islet secretions: a historical perspective
D. P. Begg and S. C. Woods

HOW WE TEACH

Effect of an individual readiness assurance test on a team readiness assurance test in the team-based learning of physiology
C. Gopalan, D. J. Fox, and C. J. Gaebelein

Teaching physiology online: successful use of case studies in a graduate course
G. Casotti, J. T. Beneski, and M. T. Knabb

A writing-intensive course improves biology undergraduates’ perception and confidence of their abilities to read scientific literature and communicate science
S. E. Brownell, J. V. Price, and L. Steinman

Evaluation of a peer mentoring program for a mature cohort of first-year undergraduate paramedic students
D. H. Hryciw, K. Tangalakis, B. Supple, and G. Best
Do learning approaches of medical students affect their satisfaction with problem-based learning?  
E. Gurpinar, E. Kulac, C. Tetik, I. Akdogan, and S. Mamakli

Combination of didactic lectures and review sessions in endocrinology leads to improvement in student performance as measured by assessments  
A. Qureshi, C. Cozine, and F. Rizyi

SOURCEBOOK OF LABORATORY ACTIVITIES IN PHYSIOLOGY

Cold stress and the cold pressor test  
D. U. Silverthorn and J. Michael

Pulmonary and cutaneous O₂ gas exchange: a student laboratory exercise in the frog  
G. J. Tattersall, S. Currie, and D. M. LeBlanc

ILLUMINATIONS

Use of Wikiversity and role play to increase student engagement during student-led physiology seminars  
S. Singh

Conception of learning and clinical skill acquisition in undergraduate exercise science students: a pilot study  
N. Johnson, V. Chuter, and K. Rooney

Illustrating concepts of quantal analysis with an intuitive classroom model  
M. A. Xu-Friedman

Respiratory belt transducer constructed using a singing greeting card beeper  
A. Bhaskar, S. Subramani, and R. Ojha

MEETING REPORTS AND ANNOUNCEMENTS

International Union of Physiological Sciences Physiology Teaching Workshop, March 31–April 1, 2012, Arabian Gulf University, Kingdom of Bahrain  
M. M. F. Subhan

No. 2. JUNE, 2013

HISTORICAL PERSPECTIVES

Forgotten hardware: how to urinate in a spacesuit  
H. Hollins

USING CLASSIC PAPERS TO TEACH PHYSIOLOGY

Using a classic paper by Robin Fåhraeus and Torsten Lindqvist to teach basic hemorheology  
L. N. Toksvang and R. M. G. Berg

A PERSONAL VIEW

Rationale and resources for teaching the mathematical modeling of athletic training and performance  
D. C. Clarke and P. F. Skiba

HOW WE TEACH

The effectiveness of separating theory and practicum as a conduit to learning physiology  
J. A. Schuiers, S. J. McDonald, B. L. Julien, L. A. Lexis, C. J. Thomas, S. Chan, and T. Samiric

Offering an anatomy and physiology course through a high school-university partnership: the Minnesota model  
M. Jensen, A. Mattheis, and A. Loyle
A teacher-developed inquiry model to teach the molecular basis of hyperbolic kinetics in biological membrane transport
L. Marcus, J. Plumeri, G. M. Baker, and J. S. Miller

Development of concept-based physiology lessons for biomedical engineering undergraduate students

Retrieval practice is an efficient method of enhancing the retention of anatomy and physiology information
J. L. Dobson

Online feedback assessments in physiology: effects on students’ learning experiences and outcomes
N. Y. Marden, L. G. Ulman, F. S. Wilson, and G. M. Velan

Effectiveness of integrating case studies in online and face-to-face instruction of pathophysiology: a comparative study
S. M. Saleh, Y. M. Asi, and K. M. Hamed

ILLUMINATIONS
Television format or research project? Team work and the opportunity of choosing classroom-led activities reinforce active learning
B. M. Escribano, E. I. Agüera, and P. Tovar

No. 3. SEPTEMBER, 2013

EDITORIAL
Civil, sensible, and constructive peer review in APS journals
H. Raff and D. Brown

STAYING CURRENT
Explorations in statistics: the analysis of ratios and normalized data
D. Curran-Everett

Space physiology within an exercise physiology curriculum
J. R. Carter and J. B. West

HOW WE TEACH
Higher levels of intrinsic motivation are related to higher levels of class performance for male but not female students
R. N. Cortright, H. L. Lujan, A. J. Blumberg, J. H. Cox, and S. E. DiCarlo

Process-oriented guided-inquiry learning improves long-term retention of information
T. Vanags, K. Pammer, and J. Brinker

An efficient approach to improve the usability of e-learning resources: the role of heuristic evaluation
M. R. Davids, U. M. E. Chikte, and M. L. Halperin

Evaluating learning among undergraduate medical students in schools with traditional and problem-based curricula
S. A. Meo

SOURCEBOOK OF LABORATORY ACTIVITIES IN PHYSIOLOGY
Laboratory exercise: study of digestive and regulatory processes through the exploration of fasted and postprandial blood glucose
M. K. Hopper and L. W. Maurer
ILLUMINATIONS

Using an essay competition as an alternative tool for enhancing the “learning from learners” teaching approach

R. M. G. Berg, L. N. Toksvang, and R. Jabbari

The role of equal pressure points in understanding pulmonary diseases

P. J. G. M. Voets and H. A. C. van Helvoort

The concept of clearance: an alternative teaching-learning method

E. Delattre

CORRIGENDA

No. 4. DECEMBER, 2013

REFRESHER COURSE

T cell responses: naïve to memory and everything in between

Pattern recognition receptors in innate immunity, host defense, and immunopathology

R. Suresh and D. M. Mosser

HOW WE TEACH

Interactive mobile learning: a pilot study of a new approach for sport science and medical undergraduate students

S. S. Bruce-Low, S. Burnet, K. Arber, D. Price, L. Webster, and M. Stopforth

Medical students’ participation in and perception of unprofessional behaviors: comparison of preclinical and clinical phases

E. Kulac, M. Sezik, H. Asci, and D. K. Doguc

A set of vertically integrated inquiry-based practical curricula that develop scientific thinking skills for large cohorts of undergraduate students

K. Zimbardi, A. Bugarcic, K. Colthorpe, J. P. Good, and L. J. Lluka

Flipped classroom model improves graduate student performance in cardiovascular, respiratory, and renal physiology

J. D. Tune, M. Sturek, and D. P. Basile

A novel laboratory approach for the demonstration of hemodynamic principles: the arterial blood flow reflection

M. Djelić, S. Mazić, and D. Žikić

A novel approach to teach the generation of bioelectrical potentials from a descriptive and quantitative perspective

J. Rodriguez-Falces

Introducing e-learning/teaching in a physiology course for medical students: acceptance by students and subjective effect on learning

E. Felder, M. Fauler, and S. Geiler

An inexpensive 2-D and 3-D model of the sarcomere as a teaching aid

V. P. Rios and V. M. G. Bonfim

A comparison of traditional and engaging lecture methods in a large, professional-level course

C. J. Miller, J. McNear, and M. J. Metz

Case-based learning in endocrine physiology: an approach toward self-directed learning and the development of soft skills in medical students

S. Gade and S. Chari

CO₂ rebreathing: an undergraduate laboratory to study the chemical control of breathing

N. J. Domnik, S. E. Turcotte, N. Y. Yuen, S. Iscoe, and J. T. Fisher
A comparison of student performance on discipline-specific versus integrated exams in a medical school course

A. R. Thompson, M. W. Braun, and V. D. O’Loughlin 370

SOURCEBOOK OF LABORATORY ACTIVITIES IN PHYSIOLOGY

Animal galloping and human hopping: an energetics and biomechanics laboratory exercise

S. L. Lindstedt, P. M. Mineo, and P. J. Schaeffer 377

Measuring dynamic kidney function in an undergraduate physiology laboratory

S. Medler and F. Harrington 384

Ion permeability of artificial membranes evaluated by diffusion potential and electrical resistance measurements

V. Shlyonsky 392

Investigating autonomic control of the cardiovascular system: a battery of simple tests

C. D. Johnson, S. Roe, and E. A. Tansey 401

An active learning mammalian skeletal muscle lab demonstrating contractile and kinetic properties of fast- and slow-twitch muscle

S. I. Head and M. B. Arber 405

Glucose transport into everted sacs of the small intestine of mice

K. L. Hamilton and A. G. Butt 415

An educational device for a hands-on activity to visualize the effect of atherosclerosis on blood flow

J. P. P. G. L. de Almeida and J. L. M. P. de Lima 427

ILLUMINATIONS

Training TAs in scientific teaching for the human physiology and anatomy laboratory

X. Chen, K. Kimball, J. Frederick, and M. J. Graham 436

Student construction of anatomic models for learning complex, seldom seen structures

H. L. Lujan, S. Krishnan, D. J. O’Sullivan, D. J. Hermiz, H. Janbahi, and S. E. DiCarlo 440
